Lighting 25000 LUX

Compatible with all types  
of gynecological chairs

## Optical colposcope ALScope HD

Optical colposcope ALScope was developed for the diagnosis and study of vagina and cervix pathologies. Equipped with stereoscopic microscope, video system, powerful LED lighter and ergonomic stand, whereby meets highest quality and functional standards. Premium optical system allows to obtain three-dimensional image of the examined area excluding color or size geometric distortion. The colposcope video system provides output to 21.5" LCD monitor and simultaneous connection to a PC with the software package BMT GynLab.

Compatible with all types of gynecological examination chairs.

### The best user experience in one system!

- **3-step zoom**

3-step magnification (3,75x-7,5x-15x) provides larger magnifying range and more selection on magnification to meet the requirement of your practice, from lowest magnification for an overview to high magnification for precise and close inspection and treatment.

- **LED illumination**

LED coaxial illuminator provides pure white color light similar to the sun light to show the real color. The bulb life can be over 10000 hours/10 years for lasting performance. It isn't only avoids the trouble of changing bulbs, but also saves your cost for the spare bulbs and electric charge.

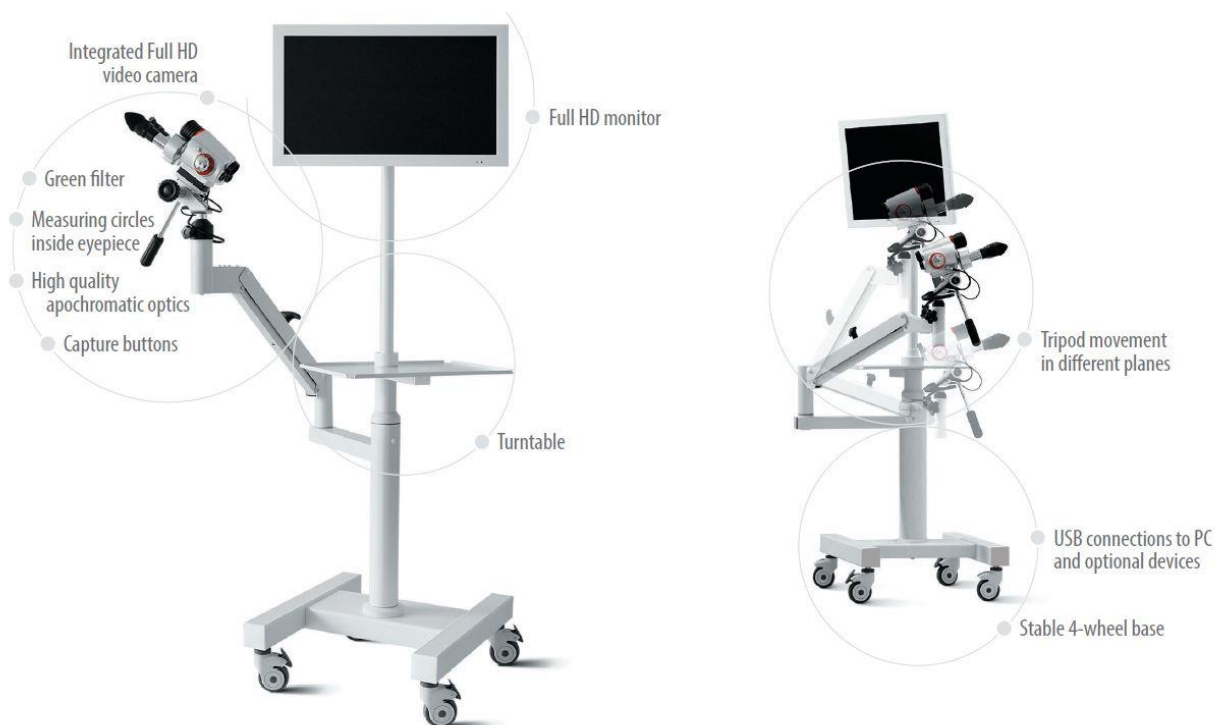

---

#### **Standart complet set:**
