

Clearance certificate for the UVc air filters and UVc surface disinfection devices

To whom it may concern :

We hereby certify that the products listed below, manufactured and / or placed on the market by Uvrer Anemo, are not considered hazardous substances.

EC or DIN safety data sheets are therefore neither to be submitted by the manufacturer nor to be kept available by the user.

The devices used do not generate any poisonous substances in the room air, nor are substances dangerous to humans produced during the working process of the air filter and released into the room air.

The functionality of the devices is 100% environmentally friendly, non-toxic and non-polluting.

UVc air filter:

- Bora-Vichy
- Hegoa 50/100
- Siluxe 50/100
- Hegoa 500/800

UVc light in those units are confined in the devices and is not reaching outside any users.

UVc surface disinfection :

- UV-Cleaner : mobile disinfection unit
- UVDM : 360 ° room disinfection

Note that surface disinfection devices spread UVc light around them that can cause severe burn to skin and eyes without protection. Those devices shall be used with care and following instructions.

When using UVc surface disinfection (UVCleaner / UVDM), the instructions for use and application must be observed.

The devices may only be used for the specified purpose and are only used for that intended use. UVc light itself is bactericidal.
